JUN 30 1969

Dear Howard-

I have dated this July 13 on the thought you might use this for Outlook. If not, it is available for my column July 12; and I will have something else in meanwhile that is not so time-dependent.

Please let me know what you decide.

Failing another input, go ahead with the piece on your shelf, if necessary (dated 6/28 A).

  
Joshua Lederberg

P.S. I just taped a one-minute version of the same theme for CBS television. Being my paranoid self, and especially after such blasts at TV, I did extract a promise that it would not be edited, i.e., would be shown all or none.

Do you sense some selective editing in the Chronicle's version of the enclosed. (I know they're in some difficulty about the license for KRON-TV, but if anything that ought to make them lean over backwards. I don't know Carl Nolte personally at all, and he does it. Nothing was deleted that won't be reinforced by the 6/28 piece, so I'll look for next Sunday's edition to see if there is any pattern.)
